- Available in a full palette of customizable hues

PEARLMAXX

SEED ENHANCER

- Speeds drying time
- Produces a premium, high luster appearance
- Improves seed flowability and reduces seed bridging
- Little to no need for talc at planting time
- Available in many colors

COAT ALL TYPES OF SEED WITH SENSIENT®

Sensient offers versatile seed color formulations for row crops, vegetables, grass, and more. Our pigment dispersions, milled in our St. Louis, Missouri facility, can help you achieve a unique hue for your brand. We also have a full range of liquid dyes, granule dyes, and polymers. All our colorants are SGS tested for germination and accelerated aging, so you can rest assured your seeds will perform at planting time.

Let our technical team help you create a custom formulation. Talk to your Sensient Account Manager or
